SKILLS   React, Redux, Ruby, Rails, Javascript, HTML, CSS, SQL

PROJECTS

Atmosphere   (Rails, ReactJS, HTML5, CSS, Jquery, PostgreSQL)   live |
github

A React/Redux/Rails clone of popular blogsphere Medium

- Implemented User authentication check using BCrypt, session cookie authenticity check and a PostgreSQL database on the backend in unison with custom react routes in the frontend to ensure user confidentiality and enhance user experience.
- Utilized Amazon S3 cloud based services for 3rd party storage of user uploaded photos, reducing local storage load.
- Created ability to receive and fulfill client's http requests using a combination of Jquery, react, and Ruby on rails, allowing users to post stories, view other's stories, and create comments.

EscapetheShape   (Pure Javascript)   live | github

EscapetheShape is a vanilla JS game where a player dodges incoming shapes, racking up their high score

- Built player sprite and incoming shapes using Canvas and javascript, adding movement of player using oscillating motion via Javascript event listeners.
- Developed unique collision detection for core game experience and functionality using trigonometric functions and a cartesian coordinate system to find circle angles.
- Implemented start screen showing game title and Game Over screen showing player score.
